

tumbledown WAGYU

SALE – FRIDAY 27TH SEPTEMBER 2024, 12:00PM
TUMBLEDOWN CATTLE YARDS
388 GOBERTS ROAD, ASHFORD NSW

70 BULLS
12 FULLBLOOD HEIFERS
10 SEMEN PACKAGES

AuctionsPlus

How to register as an AuctionsPlus user/buyer

1. To sign up, fill in your details & create a security PIN.
2. Verify your email and phone number.
3. Enter your PIC number, ABN & business details if applicable.
4. Carefully read and accept our user rules and responsibilities.
5. Complete the user quiz.
6. Submit your request to our team.

Since 1997, Tumbledown Wagyu has been breeding black Fullblood Wagyu along the pristine Severn River at Ashford. We began with three female embryos and have since expanded to a herd of over 1,500 Fullblood registered females. This year, we will join 1,400 Fullblood cows. Our herd spans three properties: Tumbledown at Ashford, The Springs at Wellingrove, and Brooklyn at Bonshaw.

Our growth has been largely driven by extensive use of Embryo Transplanting. In addition to our Fullblood females, we implant about 100 embryos into our purebred cows annually. Over 27 years, our Fullblood numbers have steadily increased. We sell Fullblood steers to local feedlots and in the past, have also bred Purebred Wagyu and F1 to F3 cattle for feeder cattle sales to local feedlots and the export trade. Our cattle are highly sought after by feedlots, as we understand their needs through our involvement in all levels of Wagyu production.

We have consistently bred bulls for other Wagyu producers, with our bulls distributed across Australia, from Tasmania to North Queensland. This year marks our second production sale. Our inaugural sale was held at Glen Innes Saleyards; this year, it will be hosted at our base at Tumbledown Ashford.

Our cattle are known for their resilience and ability to thrive in various conditions. We continue to sell bulls through inquiries from returning clients or recommendations. Initially, we were guided by Simon Coates and purchased our original cattle from Sumo, which still influences our bloodlines.

The average marble score of our sale bulls is an impressive 2.4, placing them in the top 8% of the breed for marbling. Some bulls with moderate marbling EBVs have been selected for their exceptional carcass weight EBVs. All our bulls are vet-checked, semen-tested, and ready to work. They have received a full vaccination schedule, including Vibrovax, Piliguard, Pestigard, and Ultravac 7in1, and have been drenched with Ivomec Plus and Paramectin Pour On.

Whether you're seeking high marbling bulls with moderate size for the F1 market or larger frame bulls with more maternal traits, we have the bulls for you. Our sale bulls are sired by 22 different bulls, offering a wide range of genetic options, with four different bulls used in ET programs and 18 different sires provided by Tumbledown.

SALE INFORMATION

BUYERS REGISTRATION

The Buyers number system will be in operation. All prospective purchasers are asked to register prior to the sale.

ONLINE & PHONE BIDDING

If you are unable to attend on the day, the sale will be conducted in conjunction with AuctionsPlus. Please refer to the inside cover for further information. Phone bidding can be arranged through BJA Stock and Station Agents or your preferred agent.

VISITOR SAFETY

All of the sale animals have been screened for temperament and are quiet under normal circumstances, *however visitors enter the cattle pens at their own risk. Children/Prams must not enter the sale pens.*

OUTSIDE AGENT REBATE

A rebate of 2% is payable to all agents who introduce their clients in writing prior to sale day and settle their account within 7 days.

GST

All animals are sold exclusive of GST. GST is added to your invoice.

INSURANCE

Bulls are a valuable and vulnerable asset to your business. We highly recommend insuring your new purchase at the completion of the sale. Insurance will be available on site.

TRANSPORT

It is the purchaser's responsibility to arrange their own transport from farm cattle yards at their own cost. There will be a livestock carrier on site on sale day.

HERD HEALTH

All our bulls are vet checked, semen tested and ready to work. They have received a full vaccination treatment schedule including Vibrio Vax, Piliguard, Pestigard and Ultravac 7in1. They have been drenched with Ivomec Plus and Paramectin Pour On.

DISCLAIMER

All reasonable care has been taken to ensure that the information provided in this catalogue is correct at the time of publication. However, the vendor and the selling agents do not assume any responsibility for the correctness or accuracy of the information provided. It is advised to seek independent verification of any information contained in this catalogue before relying on such information.

The vendors and agents are willing to provide assistance for those seeking guidance on the sale animals. However, the final decision is that of the purchaser and it is recommended that the purchaser either inspect the cattle thoroughly on sale day or at private inspection before the sale.

SALE DAY

EBVs EXPLAINED

EBVs

An animal's breeding value is its genetic merit, half of which will be passed on to its progeny.

FERTILITY AND BIRTH

Scrotal Size EBV (cm) is an indicator of male fertility in regard to semen quality and quantity in Western breeds of cattle. Higher (positive) EBVs indicate higher fertility. There is also a small negative correlation (desirable) with age of puberty and fertility in female progeny. The relationship between scrotal size and fertility in Wagyu is assumed, but not proven.

Gestation Length EBV (days) is based on AI records. Lower (negative) GL EBVs indicate shorter gestation lengths which generally relate to lighter birth weights and easier calving.

Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

GROWTH

Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weight of their calves.

200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-DayWeight EBV (kg) is calculated from the weight of animals taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-DayWeight EBV (kg) is calculated from the weight of animals taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

CARCASE

Carcase Weight EBV (kg) is based on abattoir carcass records and live weight measurements (particularly 600 Day weight) and is an indicator of the genetic differences in carcass weight at the industry average slaughter age of 990 days. Larger positive values are more favourable.

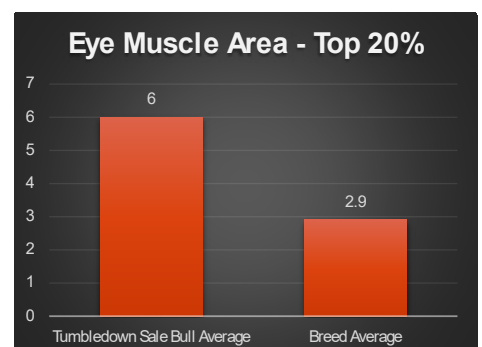

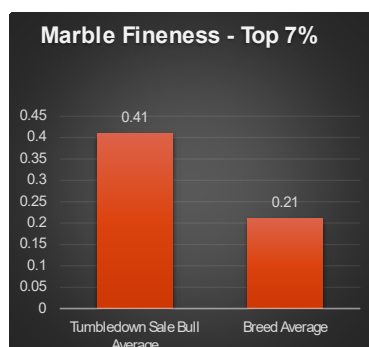

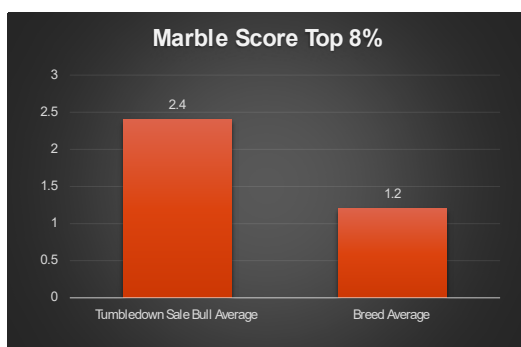

Eye Muscle Area EBV (cm²) estimates genetic differences in eye muscle area at the 12/13th rib site of a 420kg dressed carcass. A higher positive EBV indicates larger eye muscle area and therefore higher retail beef yields. Ultrasound, Aus-Meat and Japanese Digital Image Camera measured Eye Muscle Areas from slaughter animals contribute to this EBV.

Rump Fat EBV (mm) estimates the genetic differences in fat depth at the PS site of a 420kg dressed carcass. A higher positive EBV indicates more subcutaneous fat and earlier maturity.

Retail Beef Yield Percent EBV (%) estimates the genetic differences in total (boned out) meat yield as a percentage of a 420kg dressed carcass. A higher positive EBV indicates higher percentage yield for the 420kg carcass weight.

Marble Score EBV (Aus-Meat Marble Score) is an estimate of the genetic difference in the Aus-Meat Marble Score in a 420kg carcass. Marble Score EBV utilises Aus-Meat Marble score on a scale of 1 to 10 where 10 is equivalent to an Aus-Meat Marble Score grading of 9+. Where results from the Meat Image Japan digital carcass camera are available, Camera Marbling Percentage and Marble Fineness are also used to calculate Marble Score EBV as the genetic correlations between these measures and Aus-Meat Marble Score are very high. Larger positive values are more favourable.

Marble Fineness EBV (Marbling Fineness Index) estimates the genetic differences in the Marbling Fineness Index (degree of fineness of marbling fat) as measured by the Japanese Digital Image Camera. A higher more positive EBV indicates higher levels of marbling fineness.

BREEDER FEEDER INDEX (BFI)

Introduced in 2024, the Breeder Feeder Index (BFI) is a balanced selection index designed to help Wagyu breeders select the most profitable animals for a self-replacing herd while effectively managing birth weight, milk production, and mature cow weight. The BFI estimates genetic differences between animals in terms of net profitability for cows joined, based on the production of 435kg for steers and a 385kg carcass from heifers at 28 months of age. The BFI places the following emphasis on key traits: 40% Marble Score, 19% Carcass Weight, 5% Eye Muscle Area, 12% Birth Weight, 6% 200-Day Gain, and 8% Milk.

SELF REPLACING INDEX (SRI)

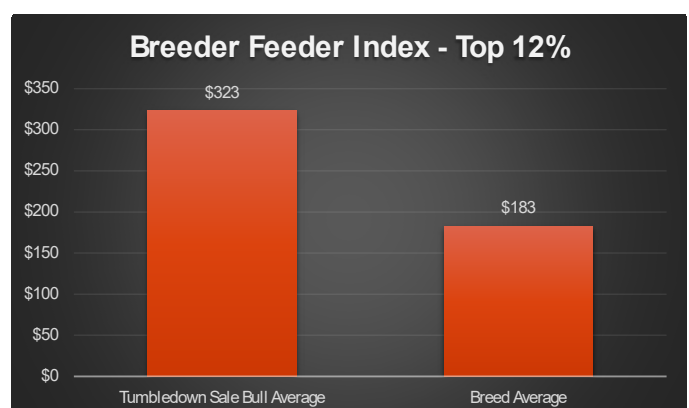

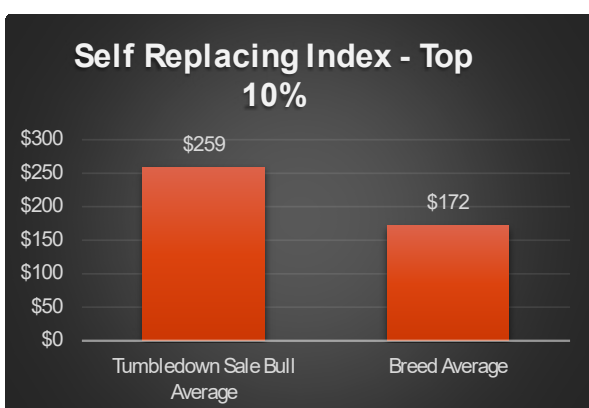

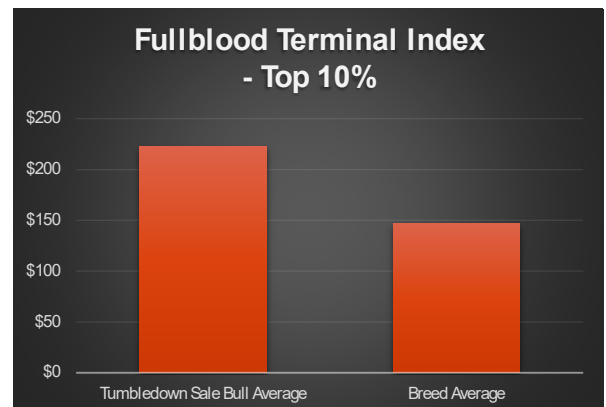

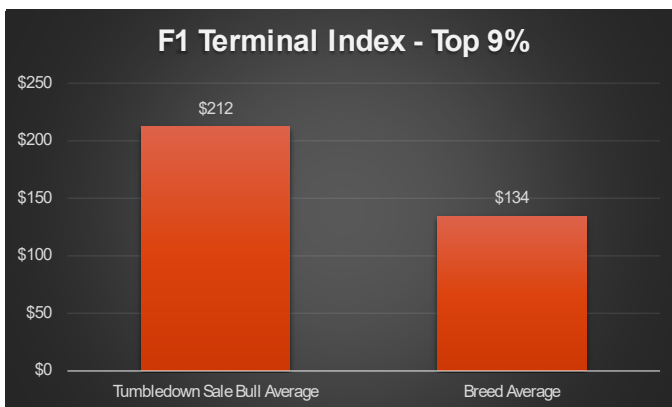

The Self Replacing Index (SRI) is designed to help select Fullblood bulls that will produce more profitable females when retained in Fullblood or Purebred herds, as well as profitable slaughter progeny. The SRI estimates genetic differences between animals based on net profitability per cow joined for the production of replacement females and slaughter steers, targeting a carcass weight of 435kg at 32 months of age. The SRI emphasizes the following main traits in terms of relative economic importance: 38.5% Marble Score, 13% Residual Feed Intake (RFI) feedlot, 11% sale liveweight (reflecting growth potential and carcass weight), 8% meat yield, 6% dressing percentage, and 23.5% on other cow and calf traits.

FULLBLOOD TERMINAL INDEX (FBTI)

The Fullblood Terminal Index (FBTI) places increased weighting on the Marble Score EBV and is used to select bulls for producing profitable slaughter progeny, with none retained for breeding. The FTI estimates genetic differences between animals in terms of net profitability per cow joined, based on producing slaughter stock only, with a 435kg carcass from steers at 32 months of age and a 385kg carcass from heifers at 29 months of age. In terms of relative economic importance, the FTI emphasizes the following main traits: 64% Marble Score, 11% Residual Feed Intake (RFI) feedlot, 9% sale liveweight, 7% meat yield, 5% dressing percentage, and 3% on other animal traits, with 0% on maternal traits.

F1 TERMINAL INDEX (F1TI)

The F1 Terminal Index (F1TI) gives significant priority to the Marble Score EBV and is intended for selecting bulls to produce profitable F1 slaughter progeny without retention for breeding. The F1TI evaluates genetic differences in terms of net profitability per cow joined, focusing on producing a 420kg carcass from steers and a 385kg carcass from heifers at 28 months of age. Economically, the F1TI emphasizes the following main traits: 68% Marble Score, 9% Residual Feed Intake (RFI) feedlot, 4% sale liveweight, 6% meat yield, 4% dressing percentage, and 9% on other young animal traits, with 0% on maternal traits.

TUMBLEDOWN WAGYU BREEDING PROGRAM

Tumbledown has a rich history of breeding high-marbling cattle, with marbling remaining the primary focus of our breeding programs. The 2022–2023 crop of bull calves showcases exceptional marbling genetics, boasting an average marble score of 2.4—double the breed average.

In addition to marbling, Tumbledown emphasizes carcass traits such as Marble Fineness and Eye Muscle Area to maximize profitability. Our sale bulls have averages for Marble Fineness and Eye Muscle Area that are twice the breed average.

Each year, we naturally join 1400 Fullblood cows and also utilize 100 Purebred cows as recipients for our Embryo Transfer (ET) Programs. These ET programs, undertaken by The Repro Group, keep us at the forefront of Wagyu performance. Notable bulls used in our ET work include MYMFP0342, MYMFQ007, WPPFP00011, DSWFN4431, IGWFS0129, PSKFQ0540, ADBFL0010, SMOFFO154, and SMOFF0126.

GETTING STARTED WITH WAGYU

F1 PRODUCTION

Historically, most of our sale bulls have been joined with Angus females and integrated into F1 Wagyu programs. If you're considering entering this market, here are some key points to keep in mind:

Relationships: Less than 10% of F1s are traded through public markets like AuctionsPlus. Most cattle are sold directly into supply chains. If you're new to F1s, we recommend contacting a supply chain to discuss your breeding plans. They may want to know the type of females you'll use and have specific requirements for the bulls suited to their F1 programs.

Marbling is King: In F1 programs, the first metric to consider is the marble score EBV. Supply chains typically look for a marble score EBV average of over 1.8.

Growth: While marbling is crucial, producers are still paid based on live weight. Therefore, consider the growth figures of the animals. Keep birth weight in mind—though Wagyu are generally smaller, they can produce larger calves. We recommend a birth weight EBV of under 2.5 for heifers. For cows, there is more flexibility to push for higher birth weights.

A common question is the growth rate difference between F1s and straight Angus. Considering various factors, including specific Wagyu bull growth figures, the average discounted growth rate is about 10%.

Replacement Females: While our focus is on the bulls, equal attention should be given to the female side of your breeding program. We recommend selecting females from studs that emphasize carcass traits.

PUREBRED AND FULLBLOOD PRODUCTION

An increasing number of Wagyu producers are entering the industry focussing on Purebred and Fullblood production. They are attracted by the premium prices on offer and a more stable market.

Marbling: In Purebred and Fullblood programs feedlots remain focussed on marbling EBVs but also place a much higher importance on Carcass Weight and Growth Weight EBVs than in F1 production. Purebred and Fullblood supply chains typically look for a marble score average of over 1.5.

Growth and Carcass Weight: Most strains of Wagyu are smaller framed than Angus cattle and it is important to keep size in the animal. Bulls selected for these sorts of production should have growth rate EBVs and carcass weight EBVs above breed average.

Replacement Females: The majority of Purebred and Fullblood breeders are keeping their females for replacement heifers. It is important that female production traits such as Milk EBV and Calving Weights be considered in selecting your bulls.

BULL SELECTION PROCESS

All our bulls are DNA tested using 100k SNP test. They are parent verified and registered with the Australian Wagyu Association. The genomic evaluation provides us with an accurate prediction of the animals breeding merit based on 14 different areas of performance. Of course all bulls are phenotypically assessed, they are then vet checked and semen tested, including morphology testing by Inverell Vet Clinic.

CARCASE DATA ON THE PROGENY OF OUR BULLS

Feedlots have traditionally been very reluctant to share carcass data on the performance of our steers, they consider that information to be 'commercial in confidence', we are however starting to get some data of our steers in feedlots.

It takes a number of years to get carcass data on the progeny of a bull. Bulls are usually about 24 months old when joined to cows, it takes 9 months for a calf to be born. Another 18 months for the calf to enter the feedlots. They spend another 15 months in a feedlot and another 3 months for the data to be provided to us.

That means the bull is nearly 6 years old when we have carcass data on the progeny. The majority of our bulls which we are using in our herd are younger than that, however we do have data for 8 bulls with sons in today's sale. The data provided gives marble Scores of carcasses ranging from 1-9, with 9 being the highest possible.

- 74% of Tumbledown carcasses were graded 9
- The herd average marble grading was 8.5
- Both of these figures put Tumbledown amongst the industry leaders

That performance is all the more impressive given the fact that our best 100 male calves are kept as bulls and don't enter the feedlot system.

Tumbledown has 47 working bulls, not all the working bulls have sons being offered at this bull sale. Not all the bulls are old enough to have sons that have been through the feedlot system. We don't have carcass data for the AI bulls used in our breeding programs.

A PERFECT MATCH

Exceptional Offspring from Sire PSKFQ0540 and Dam MPLFR6748

The joining of Sire PSKFQ0540 and Dam MPLFR6748 has yielded outstanding offspring, noted for their exceptional marbling qualities. This combination of genetics has consistently produced calves that excel in marbling, contributing to higher meat quality and increased profitability.

The offspring from this sire and dam duo not only showcase impressive marbling but also demonstrate strong overall carcass traits, making them highly desirable in breeding programs focused on premium beef production. Their genetic lineage ensures superior meat quality, enhancing the reputation and success of our breeding program.

We take pride in this successful pairing and continue to prioritize such exceptional genetic matches to maintain our commitment to excellence in cattle breeding.

WHERE ARE WAGYU PRICES HEADING

Wagyu prices tend to mirror broader cattle market trends, and like the overall market, they experienced a downturn towards the end of 2022. Market analysts predict that the Australian cattle industry will see substantial price increases in the medium to long term. Contributing factors include Australia's strong position in key markets, global weather patterns affecting supply, and heightened demand due to drought conditions in the United States. This is likely to drive up farm gate prices for Australian producers, with values expected to return to 2022 levels.

Wagyu producers are also expected to benefit from these market conditions, given the superior quality of their beef. Analysing Wagyu prices is challenging as they vary significantly between feedlots, which often offer different prices based on the supplier's previous performance. Clients with established relationships and a history of strong cattle performance may receive above-market rates, but these prices are rarely disclosed.

In Australia, most Wagyu production is F1 (50% Wagyu, typically from Angus cows), though there is growing interest in breeding Purebred and Fullblood feeders due to their higher premiums and less volatile market. F1 production has historically been more volatile, with overproduction leading to price declines and under-supply driving prices up. Following the peak in 2022, prices dipped in mid-2023 due to increased production, but they are expected to return to 2022 levels by 2025-2026. Considering recent reductions, F1 feeder cattle still command a premium of 40-70 cents per kilogram over Angus feeder cattle.

Purebred and Fullblood Wagyu cattle have exhibited a different trend, avoiding the more significant price fluctuations seen with F1 production. Fullblood feeders continue to sell for \$7 per kilogram, demonstrating relative stability considering overall market changes.

The volatility in F1 production is compounded by the fact that both steers and heifers are sold to feedlots, resulting in higher output compared to Purebred and Fullblood breeders, who typically retain their heifers. F1 breeders tend to alternate between Wagyu and Angus bulls depending on market conditions.

Feedlots are raising their minimum requirements for bull Marble Scores, which have increased from 1.0 four years ago to 1.8 this year. This presents an opportunity to upgrade bulls while prices remain attractive. Bulls for Purebred and Fullblood breeders with a minimum Marble Score of 1.5 are still acceptable, but carcass weight is becoming increasingly important to Fullblood and Purebred breeders. The Australian Wagyu herd continues to improve, and feedlots are progressively raising their expectations for Marble Scores each year.

The 12 joined maiden heifers being offered for sale present an ideal opportunity to buy some of the best Tumbledown Wagyu genetics.

All 12 heifers were going to be retained in our herd as future breeders, but the Reserve Banks interest rate movements have motivated us to offer them for sale.

All 12 heifers have been joined to our best two working age bulls. If the calves which are produced from these joinings were bulls, they would all be good enough to be offered at todays bull sale, based on EBV's.

Both sires Black Caviar and Winx are very low birthweight bulls with exceptional Marble Scores.

Lot 1A – SIRE: Tumbledown Black Caviar

Comments: T8263's Marble Score and Fineness EBV both position him in the top 3% of the national herd. T8263's lower birth weight EBV makes him ideal for heifers. His sire MPLFP5893 sired a steer that won a gold award at the AWA Branded Beef competition in 2024, underscoring his potential for producing high-quality offspring.

2024 WAGYU BRANDED BEEF COMPETITION

DMp **55%**
 DMF **8.8**
 UFA **48%**
 EMA **118 cm²**

Dam ID **MPLFN5712**
 Sire ID **MPLFP5893**

The 2024 Wagyu Branded Beef Competition saw a record number of 72 entries from 44 brands, representing 23 companies from across Australia.

The winning carcass was sired by Tumbledown Trophy Boy, MPLFP5893, a distinguished bull whose impressive genetics have contributed to the quality of the winning entry. The dam of the winning carcass, MPLFN5712, was also owned and bred by Tumbledown, further emphasizing the excellence of this breeding program.

Tumbledown Trophy Boy has made a significant mark on the herd, with seven of his sons being featured in this sale, showcasing the consistent high quality of his progeny.

TUMBLEDOWN WAGYU

THANK YOU

All of us at Tumbledown Wagyu hope you enjoy our first on-farm sale and the quality of the animals on offer. Thank you to all successful purchasers, under bidders and all who attended the sale for your support.

Any inspection and consideration of our cattle is much appreciated.

Mick & Pauleen Lewis
